## The Edison Diamond Disc Phonograph

Thomas A. Edison invented the first phonograph in 1877. From that time Mr. Edison, with his characteristic patience and tenacity of purpose, struggled with the difficulties standing in his way of the perfect recording and reproduction of music, until the year 1913, over thirty-six years, when his labors were rewarded with success, and he again turned to the world and said: "Here is now a sound reproducing instrument which is perfect in every detail—THE EDISON DIAMOND DISC."

### SPECIAL FEATURES

**NO NEEDLES TO CHANGE**—There is a smooth diamond point reproducer permanently mounted, which does not scratch and wear out the record.

**INDESTRUCTIBLE RECORDS**—They will not break, warp or twist and may be used thousands of times.

**PERFECT REPRODUCTION**—Every over-tone is clearly brought out.

**EVENNESS IN PLAYING**—Perfect pitch is maintained.

**HARSH DISCORDANT QUALITIES ELIMINATED**—No squeaky, irritating sounds that are heard on the average phonograph.

This is truly a wonderful instrument. It must be heard in order to be appreciated. We invite you to hear it on style day or at your convenience.
